

PESTICIDE AND NUTRIENT MANAGEMENT JOB SHEET NUMBER 1

(Soileach = low; Soilrun = low;
Leaching Index = med. or high)

Tract Number: _____

Field Number(s): _____

PESTICIDE MANAGEMENT

Soils in this field(s) have a low potential for pesticide leaching to the groundwater and a low potential for pesticide runoff from the field(s) to surface water.

The Florida Pest Control Guide contains a listing of pesticides suitable for each type of pest and is available from the Cooperative Extension Service. Read and follow pesticide labels.

NUTRIENT MANAGEMENT

Soils in this field(s) have a medium or high potential for nitrogen leaching to the groundwater and a low potential for phosphorous runoff from the field(s) to surface water.

A soil test will be used as a guide to determine plant nutrient needs. In addition, a listing of nitrogen and phosphorous requirements by crop type is available from the Cooperative Extension Service. Nutrients shall be added at the rate needed by the crop grown, or according to the producer's goals, whichever is lower.
